

Top Left: loosen screw at base and remove post as an assembly.
Top Middle: remove check spring from base.
Top Right: note the small piece of spring on inside. This will fit in slot in post.
Left Side: place spring on post.

Middle left: Correct position of spring, be sure it is in slot of the post.
Middle Center: Hold on to spring so it does not slip and carefully slide end of spring into the slot in the base.
Middle Right: Hold onto the spring keeping in place on post as insert all way into the bottom of the base

Above Left: turn the post counterclockwise to put tension on the spring.
Above right: Tighten the screw to hold post and maintain tension on the spring.
